Board Report

We finally got a newsletter off without the copier dying!! YAY!!

The Overdrive App will probably stop working around the end of December-ish. People will need to move over to Libby.

There is a survey for community feedback on the changes involved for the 2023 Strategic plan on the website. It is a google form embedded in a post near the top of the webpage. None of the questions are required but there is some logic built into the order of the questions – yes or no answers will get you a different path through the questions. Personal identifiers are NOT required but can be included in the final question if people want a response.

Links to Foundation Directory and Foundation Grants to Individuals is updated on the webpage. These links are based on the provider being able to identify the Library's IP address so the 'Incognito' function that Google Chrome defaults to will cause problems. Firefox or Edge should work with no problem. I did have an issue with the Grants to individuals page but re-clicked on the 'Grants to individuals' Logo at the top and it seems to have redirected appropriately.
