Board Report

May was a busy month for individual Tutoring sessions with several lasting close to two hours. Most of these sessions were with people who had taken the computer basics workshops.

I have had several patrons ask for digital conversion possibilities for older media and am in the process of collecting some software and devices that can be used to digitize older media like slides and VHS tapes. There is a limit to how much time and money we are probably willing to invest in this area but it seems like some offerings might be appreciated.

Don Watkins has contacted us again to offer the Raspberry Pi/ Python classes. I have five Pi's leftover that I am intending to use this year. In the future I would like to move towards offering only python classes without the Raspberry Pi's.

Mike Jones from CCLS has updated the Library's WI-FI system so that there are now only two networks: One for Patrons and one for Staff.

In May we purchased 3 new Ipads for the Crayon Kiosk in the Childrens' Department and are in the process of ordering new mounting brackets that fit the larger ipads.
