IT & Technical Services

Board Report

The 3 Charging stations we purchased in August were very popular and we have purchased an additional one for the teen room.

As previously mentioned Star Trek day at the beginning of the month had about 30 participants. Many thanks to everyone who helped.

September's computer basics session had two registered participants but only one who showed.

The Mutual Aid Tech Forum had only two participants.

The new switch which enables faster internet speeds and more wireless users had a bit of a rough roll-out. We are still in the process of chasing down side effects.
