Board Report

No attendees for the Mutual Aid Tech Forum, might try again in the spring.

Ordered replacements for the patron all-in-ones, the security station, 2 sign-in stations and the 2 children's all in ones. The all-in-ones seem to be having an increasing number of issues. New computers are towers and monitors which should make repairs easier if necessary, place ports in easier to find places and reduce wear from arranging the monitors.

Received 4 new laptops.
