April 2024

IT & Technical Services

Board Report

FSC completed the camera installation and got us set up with a new monitor at Security and training on the camera software.

Ellman electric will be in April 17th to install the new electrical boxes in the maker space and teen areas

Made it through the rush of 3D printing from last month, only a few things needed re-printing or modifying.

We will be running 4 Computer basics sessions in April

2 people attended the Academic writing session in early april. We talked about some of the epistemic differences within and between disciplines and how that effects the types of data that different schools of thought value or disregard. How seminal papers define these epistemic conversations and how this can make research in these areas less frustrating. Also some tips for writing and reading academic texts.

We are working with Mike Jones and Kristie Bemis from Prendergast to get a Minecraft set up going for later in April.

Tech Services will be stickering the Fantasy novels in the Adult Fiction Collection.
