IT & Technical Services

Board Report

Presented some tech ideas for a grant in early June for some sewing machines, cabinets, laptops, and a laser cutter/engraver for the makerspace area.

All of the patron computers seem to be functioning normally at the moment.

We are in the process of troubleshooting some issues with the Programming voicemail/phone.

There were some issues with the security cameras that have been resolved.

About half-way through the adult fiction/nonfiction budget.
